

## 6.11 Toileting

The ability to use the toilet, commode, bedpan, or urinal. This includes transferring on/off the toilet, cleansing of self, changing of pads, managing an ostomy or catheter, and adjusting clothes.

0-6 mos	7-12 mos	13-18 mos	19-24 mos	25-36 mos	3-4 yrs	4-6 yrs	6-9 yrs	9-13 yrs	14-17 yrs	18 yrs +	<input checked="" type="checkbox"/> Indicates that the item on the functional screen should be checked. <input type="checkbox"/> Indicates that the item on the functional screen should NOT be checked.
•	•	•	•	•							Applicable questions for the purposes of this screen have been covered on the Health-Related Services Section.
					•						<b>Has no awareness of being wet or soiled.</b> <input checked="" type="checkbox"/> Does not know or care that their diaper/underpants are wet or soiled.
					•						<b>Does not use toilet/potty chair when placed there by a caregiver.</b> <input checked="" type="checkbox"/> Will sit on toilet/potty chair but does not use it to void.
											<b>Incontinent during the day (of bowel and/or bladder).</b> When one does not have physical control of bowel or bladder. When considering whether child is incontinent more than 1/3rd of the time, incontinence should be counted by days, not the number of times the child voids each day. <input checked="" type="checkbox"/> Is incontinent once a day on school days (that's more than 1/3rd of the time). <input checked="" type="checkbox"/> Has accidents because s/he did not get to bathroom on time. <input checked="" type="checkbox"/> Is wet between self-cathing intervals. <input type="checkbox"/> Uses pull ups to have bowel movements but has control of his/her bowel. <input type="checkbox"/> Behavioral problems involving voiding or defecating. <input type="checkbox"/> Uses a catheter with some leakage.
						•					<b>Needs physical help (other than wiping).</b> <input checked="" type="checkbox"/> Child consistently needs hands on assistance to use toilet. <input type="checkbox"/> Child is not able to wipe him/herself after a bowel movement but is otherwise independent in toileting. <input type="checkbox"/> Needs assistance getting on or off toilet. <input type="checkbox"/> Uses adaptive equipment with toileting (for example: hand bars)

**TOILETING**

0-6 mos	7-12 mos	13-18 mos	19-24 mos	25-36 mos	3-4 yrs	4-6 yrs	6-9 yrs	9-13 yrs	14-17 yrs	18 yrs +	<input checked="" type="checkbox"/> Indicates that the item on the functional screen should be checked. <input type="checkbox"/> Indicates that the item on the functional screen should NOT be checked.
											<b>Needs physical help, step-by-step cues, or a toileting schedule.</b> A “ <u>toileting schedule</u> ” is when other people must take the child to the toilet at regular times to reduce incontinence. This does not include a child who needs verbal reminders to use the bathroom at regular times. <input checked="" type="checkbox"/> Parent/caregiver performs catheterization or assists the child with cathing. <input checked="" type="checkbox"/> Needs help wiping following a bowel movement. <input checked="" type="checkbox"/> Needs help changing menstrual pads. <input type="checkbox"/> Requests a pull up or diaper for the purpose of defecating in it. <input type="checkbox"/> Can self-cath at regularly scheduled intervals. <input type="checkbox"/> Parent/caregiver wakes a child to urinate at the same time every night to prevent bedwetting. <input type="checkbox"/> Needs assistance getting on or off toilet. <input type="checkbox"/> Uses adaptive equipment with toileting (for example: hand bars)
							•				<b>Incontinent of bowel during the night.</b>
											<b>Incontinent (of bowel and/or bladder).</b> When one does not have physical control of bowel or bladder. When considering whether child is incontinent more than 1/3rd of the time, incontinence should be counted by days, not the number of times the child voids each day. <input checked="" type="checkbox"/> Is incontinent once a day on school days (that’s more than 1/3rd of the time). <input checked="" type="checkbox"/> Has accidents because s/he did not get to bathroom on time. <input checked="" type="checkbox"/> Is wet between self-cathing intervals. <input type="checkbox"/> Uses pull ups to have bowel movements but has control of his/her bowel. <input type="checkbox"/> Behavioral problems involving voiding or defecating. <input type="checkbox"/> Uses a catheter with some leakage.
